

S380D

DOUBLE STRAIGHT LOADER

The S380D is the most popular model in the Freeway straight loader range, and there are plenty of reasons for this.

The S380D is a model for horse owners in serious competition who require extra room for themselves as well as their horses. A roomy 1800mm from chest-bar to front allows for accommodation facilities and other creature comforts and is an impressive all-rounder float for dressage, hunting, eventing, show-jumping, endurance, trekking and rodeo.
